

You'll appreciate your ENERGY STAR® qualified home every time you open a utility bill.

Look for these important energy efficiency features that can save you thousands of dollars over the life of your home.

- High-efficiency ENERGY STAR qualified air conditioning provides improved comfort.
- ENERGY STAR qualified furnaces are up to 15% more efficient than standard models.
- Properly installed insulation increases comfort and lowers utility bills.
- ENERGY STAR qualified windows employ advanced technologies to improve performance.
- Sized, sealed, and insulated ducts increase HVAC system efficiency by as much as 20%.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
