Building Homes That Protect The Environment

At The Reserve at Merrimack Valley Golf Club, LLC, we're doing our part to help protect the environment. We've built more than 15 ENERGY STAR® qualified homes since 2007 and helped remove more than 87,195 lbs of carbon dioxide from the atmosphere annually.

This is equivalent to:

- Eliminating the emissions from 7.35 vehicles
- Saving 44,460 lbs of coal
- Planting 12.15 acres of trees

As an ENERGY STAR partner, we're proud to be part of a national effort that has:

- Saved enough energy to power more than 20 million homes;
- Removed the emissions equivalent to those from 23 million vehicles; and
- Helped Americans save \$12 billion.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
